

How to draw your own cute pig

Pigs are incredible animals. In fact, did you know that pigs are very smart, social, and clean animals. It's True!

Pigs are smarter than your dog and although you often see them rolling in the mud, that is because they don't have sweat glands, so they must roll in the mud to cool themselves off.

Ever heard of the saying to pig pile? Pigs are very social livestock animals. They spend about 1/3 of everyday sleeping and no matter how much room you give them the pigs will always be touching each other and more than likely laying on each other in a pig pile.

Although pigs are often shown as pink in color, pigs come in all colors: red, black, spots, orange, white, stripes or even gray! Draw your own pig and color it however you like!
