RMP Program Level Self Assessment

Please use the following table to assess your facilities Program Level applicability.

Program Levels	Yes	No	N/A
1. Does the facility have more than the 10,000 pound threshold quantity of anhydrous ammonia? [68.10(a)]			
2. The facility has not had a release in the last 5 years with off-site exposure? [68.10(b)(1)]			
3. Is the endpoint distance for a worst-case release less than the distance to a public receptor? [68.10(b)(2)]			
4. Have emergency response procedures been coordinated with local planning and response organizations? [68.10(b)(3)]			
5. Does the facility have a listed *NAICS code(s)? (325311-nitrogenous fertilizer manufacturing) [68.10(d)(1)]			
6. Is the facility subject to OSHA PSM? [68.10(d)(2)] (anhydrous ammonia facilities meet the retail exemption if more than 50% of their sales are to end users)			

*North American Industry Classification System

**If you answered “yes” to 1-4 then your facility qualifies for Program Level 1.
(Complete the rest of the questions if you did not answer “yes” to all four.)**

If you answered “yes” to 5 or 6, and did not answer “yes” to all 1-4, then your facility is subject to Program Level 3

If your facility doesn’t qualify for Program 1 or 3, then it is the default Program Level 2
